Journal of Biomedical Materials Research

Volume Contents 1992

Issue 1, January 1992

Biomaterials: Taming the beast
M. Spector 1

Tensile strength of the interface between hydroxyapatite and bone
H. Lin, H. Xu, and K. de Groot 7

Acoustic emission during fatigue of porous-coated Ti-6AL-4V implant alloy
D. H. Kohn, P. Ducheyne, and J. Awerbuch 19

Effect of sulfonation of segmented polyurethanes on the transient adsorption of fibrinogen from plasma: Possible correlation with anticoagulant behavior
J. P. Santerre, P. ten Hove, N. H. VanderKamp, and J. L. Brash 39

High-strength hydrogels based on *N*-vinyl pyrrolidinone and 4-*t*-butyl-hydroxycyclohexylmethacrylate
G. D. Friends, J. F. Künzler, and R. M. Ozark 59

On the fractography of overload, stress corrosion, and cyclic fatigue failures in pyrolytic-carbon materials used in prosthetic heart-valve devices
R. O. Ritchie, R. H. Dauskardt, and E. J. Pennisi 69

Kinetics supramolecular structure and equilibrium properties of fibrinogen adsorption at liquid–solid interfaces
H. Nygren, M. Stenberg, and C. Karlsson 77

Enhanced ingrowth of porous-coated CoCr implants plasma-sprayed with tricalcium phosphate
J. C. Chae, J. P. Collier, M. B. Mayor, V. A. Surprenant, and L. A. Dauphinais 93

Formation of a multilayer cellular lining on a polyurethane vascular graft following endothelial cell sodding
S. K. Williams, T. Carter, P. K. Park, D. G. Rose, T. Schneider, and B. E. Jarrell 103

A finite element analysis of the push-out test: Influence of test conditions
W. J. A. Dhert, C. C. P. M. Verheyen, L. H. Braak, J. R. de Wijn, C. P. A. T. Klein, K. de Groot, and P. M. Rozing 119

Announcement 131

Issue 2, February 1992

Biological response to chopped-carbon-fiber-reinforced peek
K. A. Jockisch, S. A. Brown, T.W. Bauer, and K. Merritt 133

The effect of phase differences on the time-dependent variation of the zeta potential of hydroxyapatite
P. Ducheyne, C. S. Kim, and S. R. Pollack 147

Organoapatites: Materials for artificial bone. I. Synthesis and microstructure
S. I. Stupp and G.W. Ciegler 169

Decreased neutrophil respiratory burst on exposure to cobalt-chrome alloy and polystyrene *in vitro*
A. Shanbhag, J. Yang, J. Lilien, and J. Black 185

Microbial adherence on poly(methyl methacrylate) (PMMA) surfaces
C.-C. Chang and K. Merritt 197

Acute nephrotoxicity as an adverse effect after intraperitoneal injection of massive amounts of bioactive ceramic powders in mice and rats
K. Kawanabe, T. Yamamuro, S. Kotani, and T. Nakamura 209

Platelet adherence and detachment with adsorbed fibrinogen: A flow study with a series of hydroxyethyl methacrylate-ethyl methacrylate copolymers using video microscopy
I. A. Feuerstein, W. G. McClung, and T. A. Horbett 221

Evaluation of metallic personalized hemiarthroplasty: A canine patellofemoral model
M. LaBerge, J. D. Bobyn, G. Drouin, and C. H. Rivard 239

Differences in ceramic–bone interface between surface-active ceramics and resorbable ceramics: A study by scanning and transmission electron microscopy
M. Neo, S. Kotani, Y. Fujita, T. Nakamura, T. Yamamuro, Y. Bando, C. Ohtsuki, and T. Kokubo 255

Errata

In vivo characterization of the inflammatory properties of poly(tetrafluoroethylene) particulates
N. Kossovsky, D. Millett, S. Juma, N. Little, P.C. Briggs, S. Raz, and E. Berg 269

Platelet consumption by NHLBI reference materials and SILASTIC® silicone rubber
W.F. Ip and M.V. Sefton 271

Issue 3, March 1992

Variations between Biomer™ lots. I. Significant differences in the surface chemistry of two lots of a commercial poly(ether urethane)
B. J. Tyler, B. D. Ratner, D.G. Castner, and D. Briggs 273

Formation of focal contacts by osteoblasts cultured on orthopedic biomaterials
D. A. Puleo and R. Bizios 291

Hyaluronan solution as a cartilage antidesiccant
R. D. Bloebaum, M. H. Rubman, M. Merrell, K. Thacker, and A. A. Hofmann 303

The mechanisms of passive dissolution of titanium in a model physiological environment
K. E. Healy and P. Ducheyne 319

Comparative studies by cell culture and *in vivo* implantation test on the toxicity of natural rubber latex materials
Y. Ikarashi, K. Toyoda, N. Ohsawa, T. Uchima, T. Tsuchiya, M.-A. Kaniwa, M. Sato, M. Takahashi, and A. Nakamura 339

Ex vivo and *in vitro* platelet adhesion of RFGD deposited polymers
D. Kiaei, A. S. Hoffman, and S. R. Hanson 357

Synthesis of photoreactive poly(ethylene glycol) and its application to the prevention of surface-induced platelet activation
Y.-C. Tseng and K. Park 373

Cell adhesion and growth on synthetic elastomeric matrices containing ARG-GLY-ASP-SER-[3]
A. Nicol, D.C. Gowda, and D.W. Urry 393

Issue 4, April 1992

Glow discharge plasma deposition of tetraethylene glycol dimethyl ether for fouling-resistant biomaterial surfaces
G. P. López, B. D. Ratner, C. D. Tidwell, C. L. Haycox, R. J. Rapoza, and T. A. Horbett 415

Albumin-binding surfaces for implantable devices
J. R. Keogh, F. F. Velander, and J. W. Eaton 441

Protein adsorption of biomedical polymers influences activated monocytes to produce fibroblast stimulating factors
T. L. Bonfield, E. Colton, and J. M. Anderson 457

Preparation of poly(D,L) lactide microspheres by emulsion–solvent evaporation, and their clinical applications as a convenient embolic material
C. Grandfils, P. Flandroy, N. Nihant, S. Barbette, R. Jérome, Ph. Teyssié, and A. Thibaut 467

Mechanical properties of fibrin adhesives for blood vessel anastomosis
C. Flahiff, D. Feldman, R. Saltz, and S. Huang 481

The role of connective tissue in inhibiting epithelial downgrowth on titanium-coated percutaneous implants
B. Chehroudi, T. R. L. Gould, and D. M. Brunette 493

Human gingival tissue response to HTR polymer
R. A. Yukna and R. O. Greer, Jr. 517

High-voltage electron microscopy and conventional transmission electron microscopy of the interface zone between bone and endosteal dental implants
D. E. Steflik, A. L. Sisk, G. R. Parr, P. J. Hanes, F. Lake, M. J. Song, P. Brewer, and R. V. McKinney 529

Biotinylation of implantable collagen for drug delivery
S. T. Boyce, B. E. Stompro, and J. E. Hansbrough 547

Erratum

The use of polylactic acid matrix and periosteal grafts for the reconstruction of rabbit knee articular defects
H. P. von Schroeder, M. Kwan, D. Amiel, and R. D. Coutts 555

Issue 5, May 1992

Bone apposition to plasma-sprayed cobalt-chromium alloy
H. A. Luckey, E. G. Lamprecht, and M. J. Walt 557

Preparation and thrombogenicity of alkylated polyvinyl alcohol coated tubing
I. Strzinar and M. V. Sefton 577

Development of FRP composite structural biomaterials: Ultimate strength of the fiber/matrix interfacial bond in *in vivo* simulated environments
R. A. Latour, Jr. and J. Black 593

A comparative evaluation of the biostability of a poly (ether urethane) in the intraocular, intramuscular, and subcutaneous environments
F. R. Christ, S. Y. Buchen, D. A. Fencil, P. M. Knight, K. D. Solomon, and D. J. Apple 607

Difference in tumor incidence and other tissue responses to polyetherurethanes and polydimethylsiloxane in long-term subcutaneous implantation into rats
A. Nakamura, Y. Kawasaki, K. Takada, Y. Aida, Y. Kurokama, S. Kojima, H. Shintani, M. Matsui, T. Nohmi, A. Matsuoka, T. Sofuni, M. Kurihara, N. Miyata, T. Uchima, and M. Fujimaki .. 631

A fractographic investigation of PMMA bone cement focusing on the relationship between porosity reduction and increased fatigue life
S. P. James, M. Jasty, J. Davies, H. Piehler, and W. H. Harris 651

Preparation of dense hydroxylapatite or rhenanite containing bioactive glass composites
I. M. O. Kangasniemi, K. de Groot, J. G. M. Becht, and A. Yli-Urpo 663

Measurement of the rate of thrombin production in human plasma in contact with different materials
G. Rollason and M.V. Sefton 675

Issue 6, June 1992

Physical and biological properties of a new synthetic amino acid copolymer used as wound dressing
R. Eloy, A. Brack, N. Dorme, and A.M. Cornillac 695

The effect of lipase on the release of naltrexone from triglyceride-coated cellulose acetate phthalate microspheres
J.A. Tefft, K.V. Roskos, and J. Heller 713

Development and use of a parallel-plate flow chamber for studying cellular adhesion to solid surfaces
T.G. van Kooten, J.M. Schakenraad, H.C. Van der Mei, and H.J. Busscher 725

Blood compatibility of SPUU-PEO-heparin graft copolymers
K.D. Park, W.G. Kim, H. Jacobs, T. Okano, and S.W. Kim 739

Postadsorptive transitions in fibrinogen adsorbed to polyurethanes: Changes in antibody binding and sodium dodecyl sulfate elutability
J.A. Chinn, S.E. Posso, T.A. Horbett, and B.D. Ratner 757

Reduction of fibrinogen adsorption on PEG-coated polystyrene surfaces
K. Bergström, K. Holmberg, A. Safranj, A.S. Hoffman, M.J. Edgell, A. Kozlowski, B.A. Hovanes, and J.M. Harris 779

Effect of local hemostatics on bone induction in rats: A comparative study of bone wax, fibrin–collagen paste, and bioerodible polyorthoester with and without gentamicin
E. Solheim, E.M. Pinholt, G. Bang, and E. Sudmann 791

Effect of soft segment chemistry on the biostability of segmented polyurethanes: II. *In vitro* hydrolytic degradation and lipid sorption
A. Takahara, R.W. Hergenrother, A.J. Coury, and S.L. Cooper 801

Stimulation of neutrophil movement by metal ions
J.A. Hunt, A. Remes, and D.F. Williams 819

Technical note

Normal statistics or not?
E.P. Lautenschlager, M.M. Winkler, P. Monaghan, and J.L. Gilbert 829

Letters to the Editor 831

Announcements 835

Issue 7, July 1992

Cytokine and growth factor production by monocytes/ macrophages on protein preadsorbed polymers
T. L. Bonfield, E. Colton, R. E. Marchant, and J. M. Anderson 837

TNF and IL-1 generation by human monocytes in response to biomaterials
M. A. Cardona, R. L. Simmons, and S. S. Kaplan 851

Role of serum vitronectin and fibronectin in adhesion of fibroblasts following seeding onto tissue culture polystyrene
J. G. Steele, G. Johnson, and P. A. Underwood 861

Bone formation process in porous calcium carbonate and hydroxyapatite
H. Ohgushi, M. Okumura, T. Yoshikawa, K. Inoue, N. Senpuku, S. Tamai, and E. C. Shors 885

Bone induction by demineralized bone particles: Long-term observations of the implant–connective tissue interface
J. W. Hagen, J. M. Semmelink, C. P. A. T. Klein, B. Prahl-Andersen, and E. H. Burger 897

Biocompatibility studies on plasma polymerized interface materials encompassing both hydrophobic and hydrophilic surfaces
S. D. Johnson, J. M. Anderson, and R. E. Marchant 915

Adhesive bone cement containing hydroxyapatite particle as bone compatible filler
K. Ishihara, H. Arai, N. Nakabayashi, S. Morita, and K. Furuya ... 937

Thrombin and albumin adsorption to PVA and heparin-PVA hydrogels. I. Single protein isotherms
B. A. H. Smith and M. V. Sefton 947

Calcification and stress distribution in bovine pericardial heart valves
G. M. Bernacca, A. C. Fisher, R. Wilkinson, T. G. Mackay, and D. J. Wheatley 959

Agarose for a bioartificial pancreas
H. Iwata, T. Takagi, H. Amemiya, H. Shimizu, K. Yamashita, K. Kobayashi, and T. Akutsu 967

Issue 8, August 1992

Short-term response of brain tissue to cerebrospinal fluid shunts *in vivo* and *in vitro*
M. R. Del Bigio and S. Fedoroff 979

Hydroxylapatite coating of porous implants improves bone ingrowth and interface attachment strength
S. D. Cook, K. A. Thomas, J. E. Dalton, T. K. Volkman, T. S. Whitecloud, III, and J. F. Kay 989

Polyurethanes bearing pendant amino acids: Fibrinogen adsorption and coagulant properties
J. P. Santerre, P. ten Hove, and J. L. Brash 1003

Theoretical analysis on cell size distribution and kinetics of foreign-body giant cell formation *in vivo* on polyurethane elastomers
Q. H. Zhao, J. M. Anderson, A. Hiltner, G. A. Lodoen, *and C. R. Payet* 1019

Biomaterial-induced alterations of neutrophil superoxide production
S. S. Kaplan, R. E. Basford, E. Mora, M. H. Jeong, and R. L. Simmons 1039

Synthesis of antibiotic-loaded hydroxyapatite beads and *in vitro* drug release testing
K. Yamamura, H. Iwata, and T. Yotsuyanagi 1053

Synthesis and nonthrombogenicity of polymer membrane with surface-graft polymers carrying thrombin inhibitor
Y. Ito, L.-S. Liu, R. Matsuo, and Y. Imanishi 1065

Influence of calcium concentration on the dentin wettability by an adhesive
M. Panighi and C. G'Sell 1081

Relations between *in vitro* cytotoxicity and crosslinked dermal sheep collagens
M. J. A. van Luyn, P. van Wachem, L. O. Damink, P. J. Dijkstra, J. Feijen, and P. Nieuwenhuis 1091

Announcements 1111

Issue 9, September 1992

Microhardness measurements of renal calculi: Regional differences and effects of microstructure
P. Zhong, C. J. Chuong, R. D. Goolsby, and G. M. Preminger 1117

In vitro corrosion fatigue of 316L cold worked stainless steel
M. Taira and E. P. Lautenschlager 1131

Tensile testing of tubular vascular grafts produced by thermal compression fusion of flat collagenous materials
A. Wyler and R. T. Markus 1141

Compositional dependence of calcium phosphate layer formation in fluoride Bioglasses®
C. Y. Kim, A. E. Clark, and L. L. Hench 1147

PEO enhancement of platelet deposition, fibrinogen deposition, and complement C3 activation
E. L. Chaikof, E. W. Merrill, A. D. Callow, R. J. Connolly, S. L. Verdon, and K. Ramberg 1163

Calcification of implanted vascular tissues associated with elastin in an experimental animal model
W. J. Paule, S. Bernick, B. Strates, and M. E. Nimni 1169

Protein interaction with tantalum: Changes with oxide layer and hydroxyapatite at the interface
C. P. Sharma and W. Paul 1179

Introducing a selectively biodegradable filament wound arterial prosthesis: A short-term implantation study
D. Cohn, Z. Elchai, B. Gershon, M. Karck, G. Lazarovici, J. Sela, M. Chandra, G. Marom, and G. Uretzky 1185

Antisera binding onto metals immersed in human plasma *in vitro*
B. Wälivaara, A. Askendal, H. Elwing, I. Lundström, and P. Tengvall 1205

Human neutrophil response to short-term exposure to F-75 cobalt-based alloy
J. Yang, A. Shanbhag, J. Lilien, and J. Black 1217

Decreased tissue reaction to bioprosthetic heart valve material after L-glutamic acid treatment. A morphological study
M. Grabenwöger, M. Grimm, E. Eybl, C. Leukauf, M. M. Müller, H. Plenk, Jr., and P. Böck 1231

Prevention of tissue calcification on bioprosthetic heart valve by using epoxy compounds: A study of calcification tests *in vitro* and *in vivo*
T. Xi, J. Ma, W. Tian, X. Lei, S. Long, and B. Xi 1241

Technical note

Polymeric hydrogels for soft contact lenses
J. Singh, K. Agrawal, A. R. Ray, J. P. Singhal, H. Singh, V. K. Dada, and M. R. Mehta 1253

Issue 10, October 1992

Influence of the substrate binding characteristics of fibronectin on corneal epithelial cell outgrowth
D. K. Pettit, T. A. Horbett, and A. S. Hoffman 1259

Evaluation of hydroxylapatite/poly(L-lactide) composites: Mechanical Behavior
C. C. P. M. Verheyen, J. R. de Wijn, C. A. van Blitterswijk, and K. de Groot 1277

In vitro synergistic, antagonistic, and duration of exposure effects of metal cations on eukaryotic cells
J. C. Wataha, C. T. Hanks, and R. G. Craig 1297

Mechanism and strength of bonding between two bioactive ceramics *in vivo*
Y. Fujita, T. Yamamuro, T. Nakamura, T. Kitsugi, S. Kotani, C. Ohtsuki, and T. Kokubo 1311

Effect of surface processing on the attachment, orientation, and proliferation of human gingival fibroblasts on titanium
M. Könönen, M. Hormia, J. Kivilahti, J. Hautaniemi, and I. Thesleff 1325

Cell-type-specific adhesion mechanisms mediated by fibronectin adsorbed to chemically derivatized substrata
K. Lewandowska, E. Pergament, C. N. Sukenik, and L. A. Culp 1343

The ultrastructure of the bone–hydroxyapatite interface *in vitro*
J. D. de Bruijn, C. P. A. T. Klein, K. de Groot, and C. A. van Blitterswijk 1365

Polypropylene small diameter vascular grafts
H. P. Greisler, C.W. Tattersall, S.C. Henderson, E. A. Cabusao, J. D. Garfield, and D.U. Kim 1383

Book review

The Bone–Biomaterial Interface, J. E. Davies (ed.)
J. M. Anderson 1395

Erratum

Bone apposition to plasma-sprayed cobalt–chromium alloy
H. A. Luckey, E.G. Lamprecht, and M. J. Walt 1397

Announcement 1399

Issue 11, November 1992

Morphological assessment of hepatoma cells ($HepG_2$) microencapsulated in a HEMA-MMA copolymer with and without Matrigel
J. E. Babensee, U. De Boni, and M.V. Sefton 1401

A comparative study of ultrastructures of the interfaces between four kinds of surface-active ceramic and bone
M. Neo, S. Kotani, T. Nakamura, Y. Yamamuro, C. Ohtsuki, T. Kokubo, and Y. Bando 1419

Influence of fibril length upon ePTFE graft healing and host modification of the implant
K. Hirabayashi, E. Saitoh, H. Ijima, T. Takenawa, M. Kodama, and M. Hori 1433

Spatial and temporal changes in compliance following implantation of bioresorbable vascular grafts
H. P. Greisler, K. A. Joyce, D.U. Kim, S. M. Pham, S. A. Berceli, and H. S. Borovetz 1449

Toxicity test of biodegradable polymers by implantation in rabbit cornea
H. Kobayashi, K. Shiraki, and Y. Ikada 1463

Toxic effect of ethylene-oxide-sterilized freeze-dried bone allograft on human gingival fibroblasts
V. L. Kudryk, M. J. Scheidt, M. J. McQuade, D. E. Sutherland, T. E. VanDyke, and J. O. Hollinger 1477

Porous polyurethane vascular prostheses with variable compliances
S. Q. Liu and M. Kodama 1489

Storage and elimination of titanium, aluminum, and vanadium salts, *in vivo*
K. Merritt, R. W. Margevicius, and S. A. Brown 1503

Tissue compatibility of collagen-silicone composites in a rat subcutaneous model
D. G. Wallace, J. Rosenblatt, and G. A. Ksander 1517

Technical note

Avoidance of photoactivation in the epifluorescence video microscopic observation of thrombosis
S. F. A. Hossiany, N. P. Desai, and J. A. Hubbell 1535

Issue 12, December 1992

Hemocompatibility of human whole blood on polymers with a phospholipid polar group and its mechanism
K. Ishihara, H. Oshida, Y. Endo, T. Ueda, A. Watanabe, and N. Nakabayashi 1543

In vitro and *in vivo* studies on bioabsorbable ultra-high-strength poly(L-lactide) rods
Y. Matsusue, T. Yamamuro, M. Oka, Y. Shikinami, S.-H. Hyon, and Y. Ikada 1553

In vitro and *in vivo* digestion of a collagen covalently immobilized onto the silicone surface
T. Okada and Y. Ikada 1569

Tissue reactions induced by modified poly(vinyl alcohol) hydrogels in rabbit cornea
H. Kobayashi, Y. Ikada, T. Moritera, Y. Ogura, and Y. Honda 1583

The fracture toughness of titanium-fiber-reinforced bone cement
L. D. T. Topoleski, P. Ducheyne, and J. M. Cuckler 1599

Mechanical deformation of polymer matrix controlled release devices modulates drug release
E. R. Edelman, A. Fiorino, A. Grodzinsky, and R. Langer 1619

Changes in fibrinogen adsorbed to segmented polyurethanes and hydroxyethylmethacrylate-ethylmethacrylate copolymers
S. M. Slack and T. A. Horbett 1633

Interactions of thermally denatured fibrinogen on polyethylene with plasma proteins and platelets
F. Rubens, J. Brash, J. Weitz, and R. Kinlough-Rathbone 1651
